Amazing Georgia – the country you must visit this year!

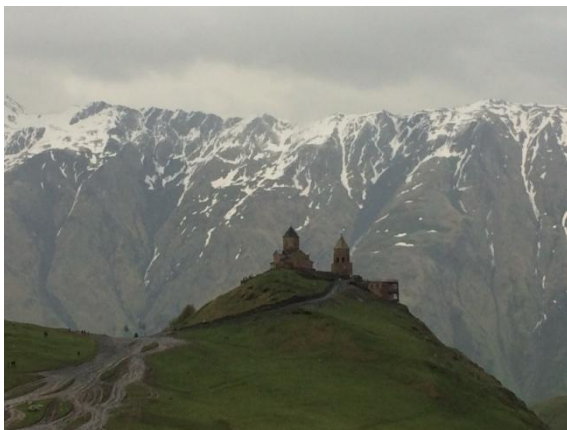

Georgia is belonging to 21 Best Budget Travel Destinations For 2017 according to Forbes: “A country usually overlooked as a budget travel destination in favour of more famous names like Czech Republic or Poland, we found Georgia to be one of the most interesting places we’ve ever visited. In Tbilisi, beautifully preserved orthodox churches and medieval style architecture are punctuated by recent modern architectural landmarks. The Georgian food is truly amazing and the most surprising element of our stay, with far more fresh vegetables and unique flavours than we ever expected.”

And we can only agree with this and not because we read it in the books or magazines but we simply were present there with our Hungarian and Czech colleagues for 18 months, commonly implementing an EU-twinning project aimed at public employment services in Georgia!

And thus, we can give positive views and recommendations from the first hand. This is indeed an unique country reach of history, culture, nature, traditions, songs, dances and excellent food! But the most valuable are Georgian people! We have never met yet any other people who are so hospitable and who really make you feel like at home and then you wish to return again and again.

So, dear reader, do not have any doubts and simply go to discover Georgia, its beauties and people, culture and history, nature and environment, excellent wine and food because it is worth to do this. We are sure you will enjoy!

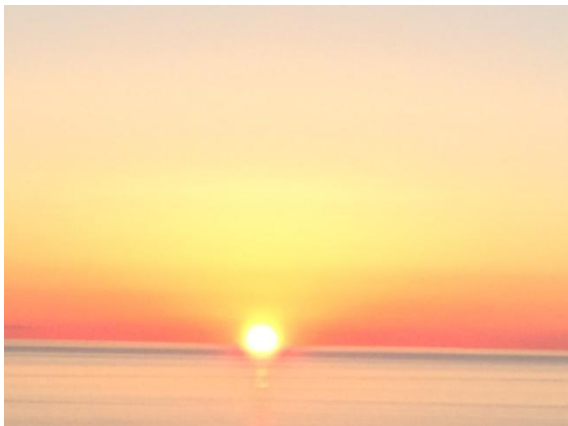

From our gallery – no matter where you go – from north to south and from west to east – you can find and enjoy real sceneries of beauty
